

# VMware Training Vouchers from TDEducation

TDEducation, in partnership with Global Knowledge now offers the hands-on training VARS need to earn the VCP Badge – the hottest certification in the market today.

## Steps to becoming a VMware Certified Professional

1. Participate in a VMware authorized course that is instructor-led to learn best practices and gain hands-on experience. The accepted courses are: "Install and Configure"; "Deploy, Secure and Analyze"; and "Fast Track". If you are a current VCP, there are no course prerequisites.
2. Gain hands-on experience with VMware. Individuals who do not have the hands on experience find it very difficult to pass the exam.
3. Enroll and pass the certification exam. To register to take the VMware Certified Professional examination please contact Pearson VUE, a third-party testing center at [www.pearsonvue.com/vmware](http://www.pearsonvue.com/vmware)

Please note that participation in a VMware authorized training class is REQUIRED for VCP certification. Candidates who take the VCP exam without a class will NOT be certified or confirmed by VMware.

## VMware training available through TDEducation:
